Mr. T has excellent news for Mr. AR! The capital has requested that the Myoblast city begin preparations to create more settlements. More towns like Myoblast will strength the kingdom and will add neighboring towns to make friends with!

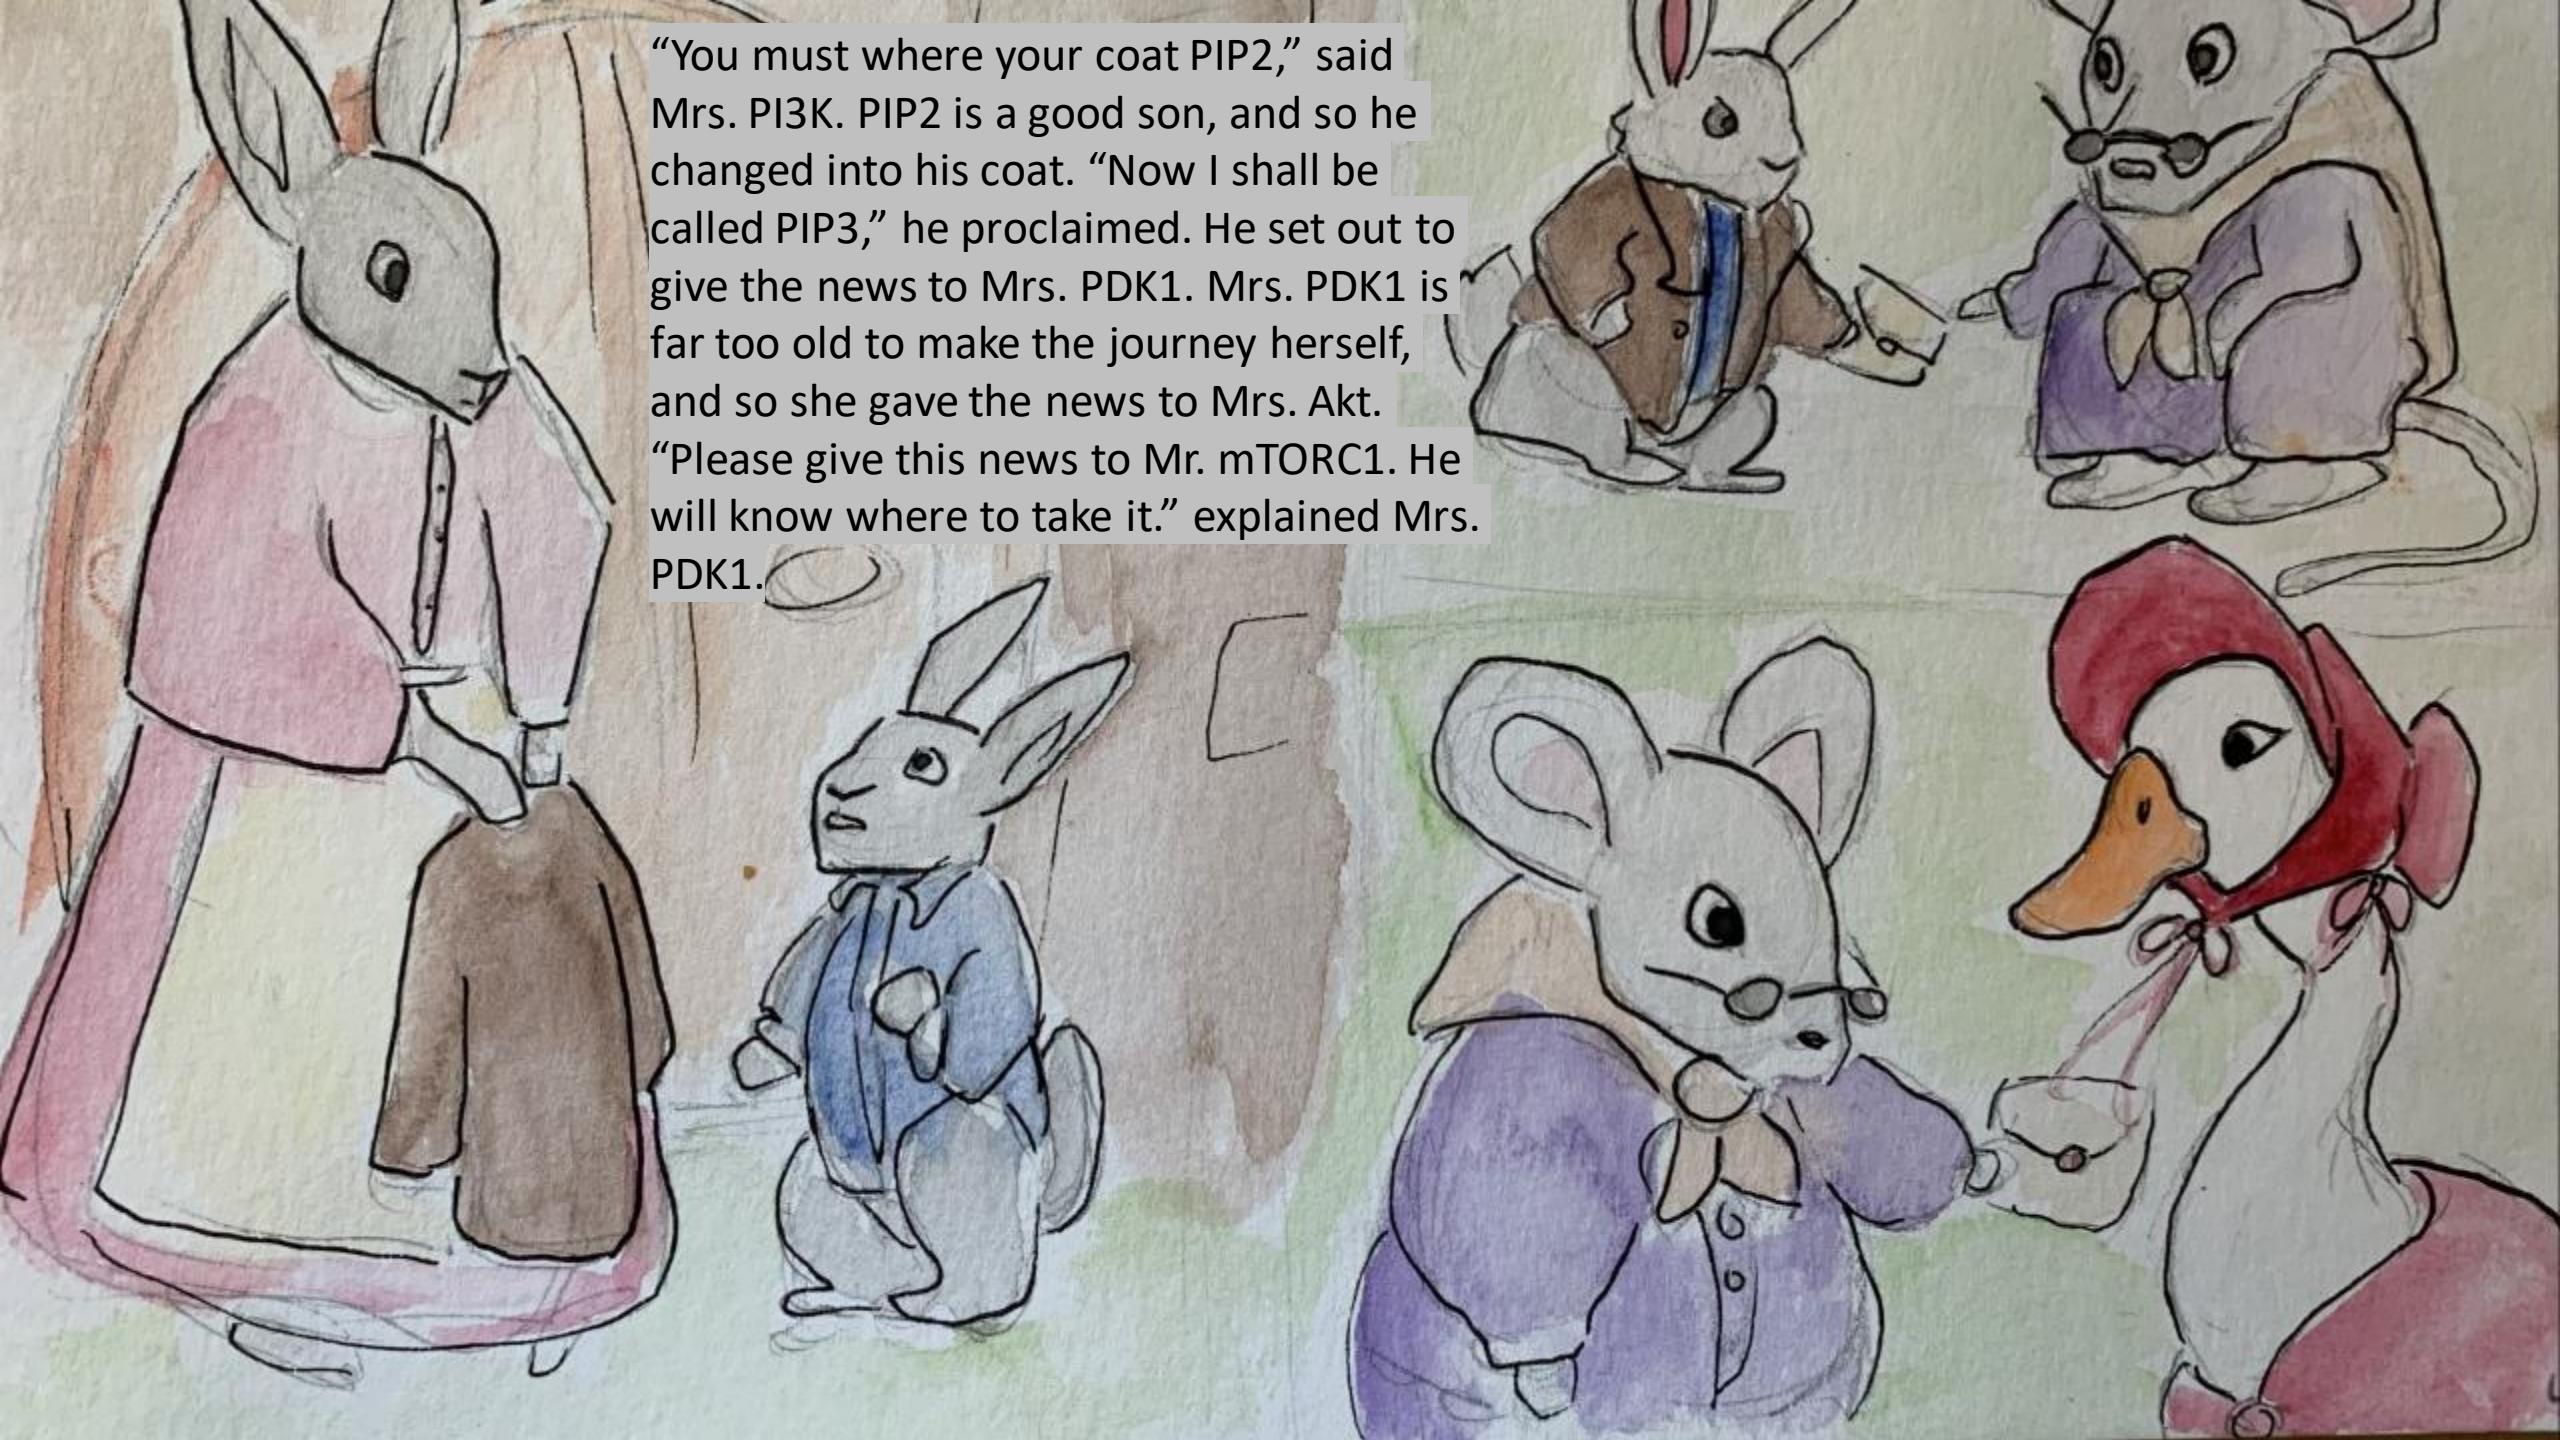

Mr. AR was delighted to receive the news. He immediately returned home to his wife Mrs. AR to share the news. They decided to go to the Court House together to deliver the letter.

Mr. IGF and Ms. IGF-1R opened the letter. It was the blueprints for the new town! "We must share this news with the builders!" they exclaimed. And so, the two set out from the Court House to the edge of town where Mrs. PI3K could be found.

Mr. IGF and Ms. IFG-1R shared the news with Mrs. PI3K. She was delighted but was far too busy to go herself. "I will prepare my son," she said.

"You must wear your coat PIP2," said Mrs. PI3K. PIP2 is a good son, and so he changed into his coat. "Now I shall be called PIP3," he proclaimed. He set out to give the news to Mrs. PDK1. Mrs. PDK1 is far too old to make the journey herself, and so she gave the news to Mrs. Akt. "Please give this news to Mr. mTORC1. He will know where to take it." explained Mrs. PDK1.

Mrs. Akt delivered the news to Mr. mTORC1. He said, "I know exactly who to tell the news, thank you Mrs. Akt."

Mr. mTORC1 first delivered the news to Mr. S6K1. "Please take this to Ms. CAD, who will produce the blueprints necessary to make tools for the workers," Mr. mTOR explained. S6K1 quickly took off so that the workers of the Court House could start right away.

A group of brown moles with yellow-striped backs are gathered in a forest. One mole on the far left has a white patch on its back and a white stripe on its side. They are looking towards the left of the frame.

Finally, Mr. mTORC1 delivered the news to the worker moles. "Would you please begin building the tools necessary to built the new towns?" Mr. mTORC1 asked. "It would be our pleasure!" Mr. 4E-BP1 exclaimed. "Let me gather Mrs. eIF4G1 and friends, and we will begin work right away," he announced. And so, production of the new towns began.

- The End
